

APPROVED PROFESSIONAL DEVELOPMENT OPTIONS

Reiki Practitioner

Accredited Reiki Treatment Practitioner

In the light of the enormous amount of new information that is constantly becoming available in every area, the need for continuing personal and professional development throughout life is an increasingly accepted concept in our society. In any professional field, keeping our knowledge and practice current plays an integral part in ensuring the safest and most effective service to our clients. Most professional associations support this concept by nominating relevant professional development activities by which their members can accrue continuing professional development (CPD) points.

Reiki Australia's Continuing Professional Development program is designed to be flexible and readily achievable, regardless of a member's geographic location. The CPD program will be reviewed regularly.

Reiki Practitioner and Accredited Reiki Treatment Practitioner members are required to keep accurate and substantiated records on the CPD log form and to provide these if requested by Reiki Australia. **Please store this record in a safe place.**
